DESCRIPTION

The TV series volumetric direct/indirect with double center light channels provide quality light with modern styling and high visual comfort. This modern design and performance make it ideal for use in airport, retail, education and commercial office buildings where low glare, high quality and clean lines are required.

FEATURES

- Hot dipped galvanized uni-body construction with inter-locking design for increased structural integrity
- Painted After Fabrication (PAF) for superior light distribution, safe handling and added corrosion resistance
- The double center light channels feature extruded acrylic lens to reduce glare and enhance the fixture performance
- NEMA type G (Grid) standard with integral EQ/Grid clips and four corner tie points
- All lamps may be installed or removed in any order
- NEC required ballast disconnect pre-installed
- UL listed, suitable for damp locations
