DESCRIPTION

TAMGRIP SERIES

Suspension Cable and Kits
Suspension cable kits provide quick installation solutions offering a sleek, professional and discreet finish without compromising on strength and safety.

FEATURES AND SPECIFICATIONS

Intended Use
By creating an adjustable loop in a suspension cable - it is easy to suspend items from beams, roof trusses, pipework, trunking or Unistrut. Individual slide locks can be purchased separately. Slide locks utilize a built-in locking mechanism that secures the suspension cable automatically and adjusts with ease. Not suitable for use in chlorinated swimming areas or other environments where corrosive elements may be present.

Construction
Suspension Wire: 304 Stainless Steel.
Slide Locks and fasteners: Zinc plated in nickel.

Applications
For use in warehouses, industrial facilities, conference rooms, reception areas, retail and where suspension mounting is required.

Cable Diameter
1/16"

Max Load
40lbs

INSTALLATION

1: Insert the suspension cable into and through the slide lock.

2: Pass suspension cable through or around the anchor point.

3: Insert suspension cable into and through the other side of the slide lock.

4. Adjust accordingly if needed.

ADJUSTMENT: Remove load from cable, depress plunger on slide lock & adjust cable height accordingly.
